## Nuclear Event France (02 July 2011) Tricastin Fire

Uploaded by [NibiruMagick2012](#) on Jul 2, 2011

In the southern French nuclear plant Tricastin it came to French media reports of an explosion. On the grounds of the southern French nuclear plant Tricastin, there have been media reports in France after a transformer explosion and fire. The fire department was able to bring the fire under control in the afternoon, it said on the website of the regional newspaper "Dauphine Libere" on Saturday. People were not injured. The management of the nuclear power plant north of Marseille on the incident itself did not immediately comment. **The transformer was part of the reactor block 1, which is currently shut down, and was located outside the nuclear zone.** Residents had reported thick black smoke. The nuclear power plant Tricastin with four pressurized water reactors of 915 megawatts each is in operation since 1981.

### Électricité de France: Fire in scandal atomic power plant Tricastin

July 3, 2011 by [Mikkai](#)

Here is a photo of Tricastin how it looks RIGHT NOW: <http://twitpic.com/5k9xc6>

**Censored in the media: Explosion and fire in atomic power plant:** <http://www.spiegel.de/wissenschaft/technik/0,1518,772028,00.html>

The fire had broken out in the afternoon outside the nuclear zone of the plant. On the grounds of the southern French nuclear plant Tricastin on Saturday there was an explosion and fire. Residents had reported thick black smoke.

Here is an excerpt of the many scandals and accidents of Electricite de France:

**[Uranium solution leaked out from French atomic power plant! – Operator: AREVA](#)**

**[Again! – Uranium leaked out from French atomic power plant! Operator: AREVA](#)**

**100 French workers contaminated!**

**[EdF's and AREVA's 4th accident at Tricastin atomic power plant!](#)**

**[French atomic power plant: Worker contaminated with radiation – Again](#)**

And this is where EdF and AREVA want to build new atomic power plants, especially their junk reactor EPR:

And [check also] the article of Le Monde diplomatique:

**<http://taz.de/1/zukunft/umwelt/artikel/1/akw-mit-3000-sicherheitsmaengel/>**

Jaitapur is a quake area and a natural resort. The EPR reactor has 3000 safety flaws.

regards,
